

About This Sample Schedule

A quick look at what the Fostering Wonder Family Scheduler can create for a family.

This generated sample shows how routines, subjects, and support needs can be organized into a clear, practical schedule. The example includes two students:

Student 1

4th grade

Student 2

1st grade

How to read the schedule

Labels make it clear which assignments need parent support and which can be completed independently.

WITH PARENT

Parent-led lesson; parent support is needed.

INDEPENDENT

Assignment can be completed independently by the student.

TOGETHER

Family activity completed together.

Built around your family

Parents enter the routines and subjects they want to cover. The Family Scheduler uses those details to create a customizable block schedule shaped around each family's specific needs.

Fostering Wonder curriculum connection

Families using the Fostering Wonder curriculum can link a student and assignment to the relevant curriculum lesson, making it easy for both parent and student to see the lesson currently in progress.

Print-friendly and device-friendly

Print the PDF, or use the electronic version with checkboxes and links to any Fostering Wonder curriculum you have previously purchased.

New accounts currently receive six months of introductory access to the Family Scheduler.
